

**PRESS  
RELEASE**

## **RELIAPON Launches AMERICAN DEFENSE™ For US Law Enforcement and Homeland Defense Agencies.**

VENTURA, CA (February 01, 2002) – Reliapon Police Products today announces the presentation of **American Defense™** a very unique brand of Aerosol Subject Restraints (ASR) specifically formulated for US Law Enforcement and Homeland Defense agencies. **American Defense™** features **AIE™ Technology** (Accelerated Inflammatory Effect), an innovative new technology available exclusively from Reliapon Police Products and its Distributors beginning February 2002.

**American Defense™** contains no carcinogens and no isopropyl alcohol, while providing homeland defense agencies with a new tool that will cause an “instantaneous results” upon exposure. **AIE™ Technology** delivers the single most significant improvement in pepper-spray performance in twenty-five (25) years. Developed expressly for US Law Enforcement, Corrections, and Homeland Defense agencies, **AIE™ Technology** features a unique combination of ingredients, mixed in a highly specialized manner, and delivered with maximum impact that facilitates the accelerated irritation, soreness, and the involuntary inflammation of the eye capillaries and mucous membranes, causing **American Defense™** to take its desired effect over 50% faster than competitive brands.

*“American Defense™ is the future for law enforcement”* states Vince Zucchero, President and CEO of Reliapon and its sister company Aerosprays, Inc., *“It is new, extremely fast-acting, and one day every brand of law enforcement pepper spray will feature AIE™ Technology from Reliapon”*.

Reliapon Police Products also produces other well-known pepper spray products such as BodyGuard Plus™, BG-X®, BG-V®, STROAM®, and RiotMASTER®. The company maintains corporate offices and manufacturing in a new 44,000 square foot facility in Ventura, CA. The company also owns the copyright and distribution rights to over twenty (20) titles of defensive tactics instructional videotapes and publications that are considered by most to be the “industry standard”.
