FOR IMMEDIATE RELEASE--

POCKET PRO™ OFFERS NEW INFRARED VERSION FOR NIGHT VISION OPERATIONS

Ventura, CA/July 1, 2004---RELIAPON POLICE PRODUCTS, INC., a leader in non-lethal products and training used worldwide by Law Enforcement and Military Agencies, has developed an Infrared Version of its very successful Pocket Pro™ 100% Hands-Free, Directable, Concealable LED Light Source. This IR Version provides the user a bright-line light source under Night Vision operations, while being invisible to the naked eye.

Developed in response to the request of the US Military, in field tests, the IR Version has garnered praise from every test agent. Major Michael M. Foley, Special Operations Command, Korea (SOCKOR) summed it up: "I think they're great. Thanks for such a useful product."

The Pocket Pro is a very lightweight, compact, and weather-resistant LED within a durable black body, that is capable of providing extremely bright light where it is needed via the use of a rotating light arm. The IR Version joins the existing family of Pocket Pro LEDs and accessories already being used by Law Enforcement and Military--that feature other LEDs in Red, White, Blue, Green and UV colors.

With its advanced microcircuitry, this small but powerful light source affords the user 40 hours of continuous run-time before replacement of the 2 lithium batteries included with the Pocket Pro. Features like the auto-off battery saving feature make this patent-pending flashlight unique in the field.
