Pocket Pro® ZR2™ DUAL LEDs

Special Purpose Hands-Free Illumination

2 Super Bright LEDs in the familiar Pocket Pro platform, with special switching sequences built into the exclusive high-tech chip circuitry, allows the user the ability to meet challenges that other LEDs cannot.

These models include all of the features of the original Pocket Pro, plus:

- Removable EZClip™ (for use with bulky clothing, hats, clipboards, etc.)
- Full 180° Rotating Light Arm—use as standard flashlight, if desired.
- Quick Change Battery Compartment.

Nite Vu™: Infrared LED for use in Night Vision Operations—the user remains **invisible** to others, but has quality lighting available when “stealth” maneuvers are required. The **Red** LED is utilized for standard procedures. **Fail-Safe Switching** prohibits any accidental lighting and insures battery availability. Developed exclusively for Military and SWAT use only. Part #001-2925. 12-Pack (#012-2925) / NSN 6230-01-533-2891.

ID Checker™: Ultraviolet LED and a focused **White** LED can be switched on independently. Ideal for validation of ID Cards, money, and other items. Part #001-2926. 12-Pack (#012-2926 / NSN 6230-01-533-2893.

Brightline™: Two Focused **White** LEDs that can be used independently or in combination for any lighting requirements. Part #001-2922. 12-Pack (#012-2922 / NSN 6230-01-533-2890)

Exclusively available from Reliapon Police Products.

Other Models May Be Available. Call for Details.
